

DOCK LADDERS

BY DAVIT MASTER

“Lightweight aluminum ladders for your seawall, dock or bulkhead.”

□ **Safety.** A DavitMaster Dock Ladder assures safe and easy access into or out of the water.

□ **3 Styles/8 Sizes.** Our ladders can be ordered either RIGID, SLIDE or HINGED and in lengths of 3 to 10 feet. (Ladder length is based on the distance from the dock or seawall to the bottom rung of the ladder.)

□ **Hinged.** With our hinged model you can store the lower rungs out of the water when the ladder is not in use.

□ **Aluminum Construction.** Each ladder is custom built from high-grade, lightweight aluminum. Aluminum is durable, long lasting and weather resistant.

□ **Quality Craftsmanship.** We specially reinforce each rung by welding underneath, as well as on each side of the rung. All welds are smooth and precise. We use only high strength cast-aluminum hinges with our hinged models.

12 FT. Rigid	19½"	12 FT. Slide	19½"

NOTE: Length of ladder denotes distance from deck or seawall to bottom rung of ladder. Custom sizes available.

Rev. 07/91. ALL RIGHTS RESERVED.

DAVITMASTER'S SLIDE LADDER

The SLIDE LADDER provides years of convenient and safe access into or out of the water.

Each ladder is custom built from high-grade, lightweight aluminum and is available in lengths of 4 to 8 feet.

The Slide Ladder is so easy to use. The lower section locks in place by simply placing a rung on the rung hanger. This also allows for adjustable ladder height.

To extend the life of your ladder, simply pull up the lower section above the water line. The Slide Ladder is retractable to eliminate marine growth and/or for easy storage.

The SLIDE LADDER installs easily to your dock or seawall. Just bolt in place and it's ready to use.

We'll ship direct anywhere in the U.S., via UPS.

Aluminum Slide Ladders	
SIZE	RISER HEIGHT
4'	19½"
5'	19½"
6'	19½"
7'	19½"
8'	19½"
10'	19½"
