

BR 85 BOAT RAMP WINCH PUSH-PULL

WORDS OF CAUTION

The BR 85 Push-Pull winch is designed for minimum grade ramps where the grade does not permit gravity feed down the ramp. Maximum allowable grade is 10%.

Use only the mounting holes provided in the winch base. The mounting plate must be allowed to flex in order to maintain proper gear tension and alignment.

INSTALLATION

- The BR 85 must be installed with the motor facing away from the load as shown.
- Use only the mounting holes provided.
- Install with 5/8" bolts.
- Mounting plate must be installed level with the ramp.
- Both cable winder drums must be full of cable with cable in all guides.
- Incoming cable  feeds over the first winder- around the second - back & around the first - until winders are full and the cable feeds back  to the pulley.
